# Acknowledge

We understand that this project is a step-by-step learning process. It is similar to studying in class and in the lab, but we can practice it in real life. This project helps us practice step by step, build bigger applications, and learn how to use different tools in our programs. We can combine many parts into one complete application and learn each concept little by little. It also helps us improve our skills and work on real-life projects.

We would like to say thank you to our professor, Mr. Le Thanh Nhan, and our classmates for their kind support during this project.

Although we made some mistakes, we hope to have more chances to learn more about web development in the future.

We also thank India APTECH for providing information and a demo project, which helped us understand this project better and gain real experience.

After finishing this project, we learned many useful things. We will continue to learn and improve ourselves to be more successful in the future.

Yours sincerely,

Team Group 02.

# Synopsis

The main objective of this program is to give us a sample project to practice real-life work. This project helps us build bigger and stronger applications step by step.

The purpose is not to teach front-end or back-end in detail, but to give us a real-life situation and help us create basic applications using the tools we have learned. Before starting, we can review our lessons to understand better.

This project is for students who have finished Semester I and studied subjects like ReactJS and PHP. We should do this project in the lab with help from our teacher when needed.

The website in this project shows information about lawyers, helping customers connect with them easily by specialization, location and enabling customers to book appointments.

It is important for us to understand the subject clearly. We should follow the project requirements and complete all assignments carefully.

## Problem Definition

In today's digital era, access to legal services is essential for individuals and businesses.

- Finding a suitable lawyer with the right specialization and availability is often a challenge.
- Traditional methods of searching for lawyers, scheduling meetings, and managing appointments are time-consuming and inefficient.
- Clients often struggle to compare lawyers' expertise, fees, and track records, making it hard to make informed choices
- People in rural or underserved areas may have fewer options and face long travel times to meet lawyers.

The LegalEase, the online Lawyers Application Website provides a centralized platform where customers can search for lawyers by specialization and location, view profiles, and book appointments.

The system aims to minimize the limitations of traditional lawyer-finding methods. At the same time, it enables lawyers to manage their professional profiles, work schedules and tracking income effectively and provides administrations with tools to control, manage and oversee operations, ensuring transparency and security across the platform.

## II. CRS/Customer Acceptance Criteria

| S.No | Customer's Acceptance Criteria                                                                                                                                                                                 |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1    | Given the customer is on the home page, when the customer enters a specialization and city/province, then the system displays a list of matching lawyers.                                                      |
| 2    | Given the customer is viewing a lawyer profile, when the customer selects an available date/time slot and submits a booking request, then the system creates the appointment and shows a booking confirmation. |
| 3    | Given the customer has an existing appointment, when the customer chooses to cancel the appointment, then the system updates the appointment status to cancelled and records the change.                       |
| 4    | Given a lawyer has submitted registration details, when the admin approves the registration, then the lawyer account becomes active and accessible for login.                                                  |
| 5    | Given the lawyer is logged into the system, when the lawyer updates profile information, then the system saves and displays the updated profile successfully.                                                  |
| 6    | Given the lawyer has defined availability slots, when a customer books one available slot, then the system marks that slot as booked and prevents double booking.                                              |
| 7    | Given the admin is logged in, when the admin reviews lawyer applications, then the system stores the approval or rejection decision correctly.                                                                 |
| 8    | Given the admin System content and community when the changes are submitted Q&A then allow to view, edit, add, delete in Q&A list and the updated content is displayed on the website                          |
| 9    | Given a registered user enters valid login credentials, when the user clicks login, then the system grants access according to the user role.                                                                  |
| 10   | Given the system contains multiple records, when the user performs search, filter, sort, or pagination actions, then the system returns the correct result set in an organized manner.                         |

|                  |                              |                              |

|                    |                                                                                                                                                                                                                                                                                                                                                                      |
|                    |                                                                                                                                                                                                                                                                                                                                                                      |
| -                  | Project Vision/Objectives:                                                                                                                                                                                                                                                                                                                                           |
|                    | To design and develop a web-based platform that simplifies the process of finding legal professionals and booking appointments online. The project aims to provide a convenient, secure, and user-friendly solution for customers, a professional profile and scheduling system for lawyers, and an efficient management and reporting system for administrators.    |
|                    |                                                                                                                                                                                                                                                                                                                                                                      |
|                    |                                                                                                                                                                                                                                                                                                                                                                      |
| -                  | Scope:                                                                                                                                                                                                                                                                                                                                                               |
|                    | The project includes customer registration/login, lawyer registration/login, lawyer profile management, lawyer search by specialization and location, appointment booking and cancellation, notifications, admin management of lawyers and customers, content management, reporting and analytics, and common features such as search, filter, sort, and pagination. |
|                    | The current scope does not include video consultation                                                                                                                                                                                                                                                                                                                |
|                    |                                                                                                                                                                                                                                                                                                                                                                      |
| -                  | Our understanding of the client organization:                                                                                                                                                                                                                                                                                                                        |

#### 5. Customer/Lawyer FAQ Dashboard

FAQ dashboard

Customer Related

▽ Q: What information should I prepare before meeting a lawyer?

A: Bring any relevant documents (contracts, receipts, correspondence) and a clear timeline of events. This helps the lawyer assess your situation quickly.

▷ Q: How can I file a complaint against a business?

Lawyer Related

▷ Q: How do we handle conflicts of interest when two potential clients approach us with opposing claims?

▷ Q: What's the process for requesting additional research support from the admin team?

**Description:** The System dashboard screen appears to allow admin to create a system notification.

**From:** When user clicks on “Add Notification” when admin click on System Notification section in admin dashboard.

**To:** Edit system notification forms, Create system notification form

## 2. Form to create notification for admin

The image shows a web form titled "Create Notification". It contains five text input fields stacked vertically, each with a label above it: "Title", "Content", "Status", "Types", and "Expired at". At the bottom of the form are two buttons: "Create" and "Cancel". The form is enclosed in a light blue border with small 'x' marks at the corners and midpoints, suggesting it might be a screenshot from a design tool.

**Description:** The “Create Notification” screen appears to allow admin to create a system notification.

**From:** When user click on “Create new system notification” in system notification section..
